

AI that delivers. For finance that demands.

Editorial manifesto.

Luxembourg-based company focused on **enterprise AI**.

Founded in Luxembourg in 2023.

We design, deploy and maintain AI services in production for Luxembourg and European financial institutions. Our team couples technical expertise and native compliance under one roof. DORA, AI Act, GDPR, CSSF built in from day one.

EasyLab AI was born to answer a simple observation. Regulated finance cannot adopt AI at the pace of AI with the methods of classic software development. A different model was needed. A different team. A different framework.

Our positioning

Not a consulting firm. Not a generic software vendor. A team that ships operational AI services, month after month, under one contractual framework.

Our conviction

The methods of the old IT world no longer hold against the pace of AI. For regulated finance, it has become a commercial condition for survival.

"AI compliance is too technical to be delegated. That is why it lives inside the team."

PHILIPPE HOUGARDY · CO-FOUNDER

SOVEREIGN HOSTING

4

NATIVE REGULATORY
FRAMEWORKS

LU

FIT 4 AI
LUXINNOVATION

Operational AI for regulated finance.

Built within the framework. Shipped in production.

Four operations to automate. Four services shipped in production. Without an extra validation cycle for every iteration.

Our services tackle operations that cost real money in regulated finance. Manual entry of trade confirmations, drafting of board minutes, investor reporting assembled by hand, data fragmented across your tools. Everything that ties up your teams instead of helping them decide.

FLAGSHIP CASE · EASYBOARD

CSSF-compliant board minutes

BEFORE

6h

WITH
EASYBOARD

<15
min

Automated generation from an audio recording. CSSF-compliant. Built with a Luxembourg fund governance specialist.

CASE · 01

Confirmations

Automated extraction from emails and PDFs. Position and confirmation reconciliation. No more manual entry.

CASE · 02

Reporting

Investor reports assembled and distributed automatically. Unified format. CSSF and ESMA alerts in real time.

CASE · 03

Document analysis

Prospectuses, term sheets, assisted due diligence. Automated KYC and AML pre-screening.

WHO WE SERVE

• Banks

• Insurers

• AIFMs

• Investment funds

• ManCos

• Family offices

Not a project, a subscription.

A new way to approach AI in the enterprise.

The project model no longer holds against the pace of AI. Procurement cycle, vendor due diligence, CSSF filing, development, acceptance. Ten to twelve months later, you ship. And the model has already changed three times.

01

KYC once and for all

One vendor due diligence at entry. One compliance review. Then you turn on the tap.

02

Adjustable speed

Your monthly fee defines your delivery capacity. You allocate speed like you allocate bandwidth.

03

Stable contract, evolving software

The contractual framework is fixed, DORA and CSSF compliant. The software evolves. No amendment to switch from one model to another.

"You buy a team and a pace, not a frozen deliverable."

PHILIPPE HOUGARDY · CO-FOUNDER EASYLAB AI

Native compliance, not an add-on.

Compliance expertise lives inside the AI team.

In regulated finance, AI compliance is not a module bolted onto a generic product. It depends on the model deployed, the data processed, the use case, the jurisdiction. It is technical, and it changes when the system changes.

DORA	EU 2022/2554	Mandatory ICT clauses · Exit plan · Resilience testing
GDPR	EU 2016/679	Integrated DPA · Article 28 · EU-hosted data
AI Act	EU 2024/1689	Risk classification · Technical documentation · Human oversight
CSSF	22/806	Outsourced IT functions · ICT incidents · Audit rights

Sovereign infrastructure. Sovereign hosting in Luxembourg. Anthropic Claude SOC 2 Type II zero retention models. DORA Article 28 exit plan included in the contract from day one.

*"No one in the market couples these two expertises under one roof.
Technical compliance cannot be delegated."*

PHILIPPE HOUGARDY · CO-FOUNDER EASYLAB AI

LET'S TALK

Thirty minutes. Your data. Our team.

No sales pitch. We look at one of your concrete cases, we show you what we would do, and you decide.
